Dear Shareholder

INVITATION TO PARTICIPATE IN SHARE PURCHASE PLAN

On 18 January 2021, DiscovEx Resources Limited (ASX:DCX) (**DiscovEx** or the **Company**) announced a A\$4 million capital raising comprising of a A\$3.5 million placement to institutional and sophisticated investors of fully paid ordinary shares in the Company at a price of A\$0.004 per share (**Placement**) and a A\$0.5 million share purchase plan (**SPP**) (together, the **Capital Raising**).

The Capital Raising was announced in conjunction with the Company's announcement that it is proposing to acquire Lighthouse Resource Holdings Pty Ltd (**Lighthouse**) (**Transaction**), which has various rights to acquire certain granted, application (subject to grant) and JV interests in mineral tenements in Western Australia as described in Schedule 2 of the Notice of General Meeting lodged on ASX on 3 February 2021, known as the Sylvania / Billinooka Project (together the **Sylvania Project**). The Sylvania Project is a gold and base metals project located in the southern Pilbara with tenements covering approximately 2,250km². The Sylvania Project is in close proximity to the Karlawinda Gold Project which is owned by Capricorn Metals Ltd. Lighthouse is an Australian company, incorporated on 15 April 2020.

In order to provide eligible shareholders with the opportunity to apply to participate in the SPP, the Company is pleased to provide details of its SPP offer (**Offer**). Under the Offer, DiscovEx is giving each Eligible Shareholder (as defined below) the opportunity to apply to purchase up to A\$30,000 worth of fully paid ordinary shares in the Company (**New Shares**), irrespective of the size of their shareholding, without incurring brokerage or other transaction costs.

The Offer is intended to raise up to A\$500,000 (before costs of the Offer) via the issue up to 125,000,000 New Shares on the SPP terms and conditions (**Terms and Conditions**) enclosed with this letter. The Offer is not underwritten.

The SPP entitles Eligible Shareholders to apply to purchase up to A\$30,000 of New Shares at an issue price of A\$0.004 per New Share (**Issue Price**), being the same price as the Shares to be issued under the Placement.

The Issue Price represents a:

- 50% discount to the closing market price of the Shares on the last day on which Shares were traded on the ASX immediately prior to the SPP being announced;
- 49% discount to the volume weighted average market price of Shares of the last five days on which Shares were traded on the ASX immediately prior to the SPP being announced; and
- 43% discount to the closing market price of the Shares on 4 March 2021.

The Offer is offered exclusively to eligible shareholders (including custodians), being registered holders of Shares as at 7.00pm (Sydney time) on 15 January 2021 (**Record Date**) with a registered address in **Australia or New Zealand** and not resident or located in the United States or any other jurisdiction in or into which an offer of New Shares would be unlawful, who meet certain other conditions as expressly prescribed in the Terms & Conditions (**Eligible Shareholders**).

The Offer opens on 9 March 2021 and is currently scheduled to **close at 5.00pm (Perth time) on 8 April 2021**. The New Shares are expected to be issued on Thursday, 15 April 2021 and commence trading on the ASX on Friday, 16 April 2021.

The SPP Offer is made in accordance with ASIC Corporations (Share and Interest Purchase Plans) Instrument 2019/547 and therefore does not require a prospectus for the purposes of Chapter 6D of the Corporations Act 2001 (Cth).

The Board urges you to monitor the Company's ASX announcements on an ongoing basis for updates in relation to the Company and Lighthouse.

Accordingly, the value of New Shares applied for is likely to rise or fall. In addition, fluctuations in the market price of Shares means that up to or after the date on which the Company issues New Shares to you, you may be able to buy Shares on the market at a lower price than the Issue Price.

DISCOVEX RESOURCES LIMITED (ACN 115 768 986) SHARE PURCHASE PLAN - TERMS & CONDITIONS

The following are the terms and conditions of the Offer. By accepting the Offer, you agree to be bound by these Terms & Conditions and the constitution of the Company.

1. ASIC Corporations (Share and Interest Purchase Plans) Instrument 2019/547

The Offer is offered in compliance with *ASIC Corporations (Share and Interest Purchase Plans) Instrument 2019/547 (ASIC Instrument 2019/547)*. ASIC Instrument 2019/547 provides relief from the requirement for the Company to provide a prospectus when offering shares to existing shareholders of a company pursuant to a share purchase plan.

2. Opening Date and Closing Date of the Offer

The Offer opens on 9 March 2021 (**Opening Date**).

The Offer closes at 5:00pm (Perth time) on 8 April 2021 (**Closing Date**).

The Company will not accept late applications. However, the Directors reserve their right, subject to the Corporations Act and the ASX Listing Rules, to vary the Closing Date without prior notice including closing the Offer early. Accordingly, the Directors encourage any Eligible Shareholders (including Custodians) wishing to participate in the Offer to lodge their Application Forms and/or remit their Application Monies as soon as possible. If the Closing Date is varied, subsequent dates may also be varied accordingly.

3. Who is eligible to participate in the Offer?

You are eligible to apply for New Shares under the Offer if you were registered as a holder of Shares as at the Record Date on the Register and if your registered address, as recorded in the Register, is in Australia or New Zealand and you are not resident or located in the United States or any other jurisdiction in or into which an offer of New Shares would be unlawful.

The Offer to each Eligible Shareholder is made on the same terms and conditions.

Your rights under the Offer are personal to you and the Offer is non-renounceable (i.e. you may not transfer your right to subscribe for New Shares to anyone else).

4. Shareholder approval

The Company has obtained shareholder approval via a resolution approved at its General Meeting held 5 March 2021 for the issue of the New Shares pursuant to the Offer.

The Company reserves the right to scale back applications in such manner as the Directors see fit. Consequently, you may not receive the New Shares which you apply for pursuant to the Offer.

5. Voluntary participation

The Offer is entirely voluntary and is subject to the Terms & Conditions. You are not obliged to participate in the Offer.

6. Issue Price

The Issue Price represents a discount of 50% to the closing price of Shares on ASX immediately prior to 18 January 2021 (being the date on which the Company announced the Offer and the Placement). The method used to calculate the Issue Price was to match it to the issue price per Share offered pursuant to the Placement.

7. Important information on price risk to consider

Before deciding whether to accept the Offer, you should refer to the current market price of the Shares, which can be obtained from your stockbroker, your financial adviser or via the ASX website.

Subscription for New Shares is a speculative investment and the market price may change between the date you apply for New Shares and the issue of New Shares to you. Accordingly, the value of New Shares applied for is likely to rise or fall. Importantly, there is a risk that during the period between the time of the Offer and when the New Shares are issued to you, the price at which Shares are traded on ASX may be less than the Issue Price. You must rely on your own knowledge of the Company and previous disclosures made by the Company to ASX.

In determining whether you wish to participate in the Offer and the extent to which you participate, you should seek your own personal financial and/or taxation advice referable to your personal circumstances.

8. How much can you invest in the Offer?

Subject to paragraph 12, if you are an Eligible Shareholder, you may subscribe for a maximum of A\$30,000 worth of New Shares.

There is a minimum amount for which you may subscribe under the Offer which is A\$1,000 worth of New Shares.

The following parcels of New Shares are available under the Offer:

	Subscription Amount (A\$)	Number of Shares
Parcel A	30,000	7,500,000
Parcel B	20,000	5,000,000
Parcel C	15,000	3,750,000
Parcel D	10,000	2,500,000
Parcel E	5,000	1,250,000
Parcel F	2,000	500,000
Parcel G	1,000	250,000

The maximum limit of A\$30,000 worth of New Shares applies to you even if you receive more than one Offer. For example, if as at the Record Date, you are both a sole and a joint Shareholder, you can only apply for New Shares once, either in your capacity as sole Shareholder or joint Shareholder, not both.

The Company will not issue any fraction of New Shares. Eligible Shareholders applying for New Shares must pay all Application Monies in Australian dollars.

No brokerage, stamp duty or other costs are payable by applicants in respect of an application for New Shares.

9. Scale Back or refusal of application

The Company intends to raise up to A\$0.5 million by the issue of New Shares. However, if total demand for the offer exceeds A\$0.5 million, the Directors may in their absolute discretion, undertake a scale back to the extent and in the manner they see fit.

Factors which the Directors may take into account in determining any scale back include, but are not limited to:

- (a) the extent to which Eligible Shareholders have sold or bought additional Shares after the Record Date and the date the application was made;
- (b) the total Application Monies received;
- (c) the amount applied for by each Eligible Shareholder;
- (d) the number of Shares held by each Eligible Shareholder at the Record Date;
- (e) whether an Eligible Shareholder remains on the register on the Closing Date;
- (f) the date the Company received the Application for Shares; and
- (g) any other such criteria as determined by the Directors in their absolute discretion.

If there is a scale back, you would likely not receive all the New Shares for which you have applied. If a scale back produces a fractional number when applied to the number of New Shares for which you have applied, the number of New Shares issued to you will be rounded down to the nearest whole number of New Shares.

If there is a scale back, the difference between the Application Monies received from you, and the number of New Shares issued to you multiplied by the Issue Price, will be refunded to you in full (in A\$ and without interest and at your sole risk).

The Directors reserve their right (in their absolute discretion) to refuse an Application (in whole or in part) if they consider that:

- (a) it is reasonable and prudent to do so;
- (b) the applicant is not an Eligible Shareholder;
- (c) the issue of those New Shares may contravene any applicable law, rule or regulation in any jurisdiction (including without limitation the Corporations Act or the ASX Listing Rules) or the requirements of any regulatory or governmental body or may require further action to be taken by the Company including, without limitation, registration of Shares or the preparation of a prospectus in any jurisdiction; or
- (d) the applicant has not otherwise complied with the Terms & Conditions.

If an Application is refused in whole or in part, the Application Monies will be returned to the applicant in full (without interest and at the applicant's sole risk).

All Directors' decisions in connection with a scale back or refusal of an application are final.

10. Shortfall

The Offer is not underwritten.

11. Risk Factors

Before deciding whether to accept the Offer, you should refer to the current market price of the Company's Shares, which can be obtained from daily newspapers, your stockbroker or financial adviser or the ASX.

Owning shares in the Company is considered a speculative form of investment and the future price of Shares can rise or fall.

Shareholders should be aware that there is a risk that the market price of the Shares may change between the date of this Offer or the date the Offer is accepted, and the date when the New Shares are issued.

Shareholders should note that the Offer is not made under a prospectus or other disclosure document and does not require the type of disclosure required under the *Corporations Act 2001 (Cth)*. Shareholders must rely on their own knowledge of the Company and previous disclosures made by the Company on the ASX. You should consult your professional adviser when deciding whether or not to accept the Offer and participate in the SPP. The contents of this document have not been reviewed by ASIC, ASX or any other any regulatory authority in any jurisdiction.

There are specific risks that relate to the Company's business. In addition, there are general risks, many of which are largely beyond the control of the Company and the directors. The following is not intended to be an exhaustive list of risk factors to which the Company is exposed:

Company Specific Risks

(a) **Contractual and completion risk**

The Transaction is subject to certain outstanding conditions precedent being satisfied or waived, being no material adverse change having occurred prior to completion and no circumstances arising or existing until completion which would constitute or give rise to a breach of any of the buyer or seller representations and warranties. There can be no assurance that the conditions precedent will be satisfied or waived, failing which the Transaction may not proceed. Should the Transaction not complete, the Company would still bear its costs incurred of negotiating and documenting the Transaction, but would not be able to acquire Lighthouse.

(b) **Tenure, access, grant and transfer of applications**

Mining and exploration tenements are subject to periodic renewal. There is no guarantee that tenements will be renewed (nor that tenement applications will be granted). There is a risk that the applications for tenements within the Sylvania Project may not be granted (objections have been lodged over some tenement application areas).

The Sylvania Project and the Company's existing projects are subject to relevant mining legislation. The renewal of the term of a granted tenement is also subject to government discretion, the Company's ability to meet the conditions imposed by relevant authorities is not certain, including compliance with the Company's work program requirements which, in turn, is dependent on the Company being sufficiently funded to meet those expenditure requirements. Renewal conditions may include increased expenditure and work commitments or compulsory relinquishment of areas of the tenements comprising the Sylvania Project or the Company's existing projects. The imposition of new conditions or the inability to meet those conditions may adversely affect the operations, financial position and/or performance of the Company.

There is no assurance that such renewals will be given as a matter of course and there is no assurance that new conditions will not be imposed by the relevant granting authority. The consequence of forfeiture or involuntary surrender of a granted tenement for reasons beyond the control of the Company could be significant.

Pursuant to the tenements comprising the Company's existing projects (and the Sylvania Project), the Company is subject to (and in relation to the Sylvania Project, Lighthouse will be subject to) payment and other obligations. In particular, tenement holders are required to expend the funds necessary to meet the minimum work commitments attaching to the tenements. Failure to meet these work commitments may render the tenement liable to be cancelled or its size reduced.

Further, if any contractual obligations are not complied with when due, in addition to any other remedies that may be available to other parties, this could result in dilution or

forfeiture of the Company's interest in its projects (or of Lighthouse's proposed interests in the Sylvania Project).

There is a risk of inability to access the land required for operations on tenements. This may, for example, be as a result of weather, environmental restraints, native title, landholder's activities, regulatory or third party objections or other factors. Such difficulties may cause delays and cost overruns (and may prevent the carrying out of activities on tenements).

Interests in tenure may also be compromised or lost due to third party interests or claims.

(c) **New Assets**

The Sylvania Project is distinct from the Company's existing project interests and consequently carries a different risk profile. The Company's success will depend on the Company being successful in exploring, establishing feasibility of and establishing mining operations in relation to its existing projects and/or the Sylvania Project, or otherwise realising value for example by asset disposals. Whilst the existing and incoming Directors have extensive industry experience, there is no guarantee that the Company will be successful in exploring and developing either its existing projects or the Sylvania Project.

(d) **Joint venture and contractual risks**

Lighthouse has an ongoing Farm-in and Exploration Joint Venture Agreement with Crest 3 over three tenement applications within the Sylvania Project (the **Crest JV Tenements**, details of which are provided in Schedule 4 of the Notice of Meeting which the Company announced to the ASX on 3 February 2021).

Under this agreement, both parties have certain obligations in order for, firstly, the tenement applications to be granted, secondly, Lighthouse to earn its interest in the tenements and thirdly, a functioning joint venture, should a Farm-in Expenditure Notice be provided to Crest.

There is a risk that the tenements the subject of the Farm-in and Exploration Joint Venture Agreement with Crest will not be granted.

There is a risk that DCX may not meet minimum expenditure requirements that it must meet in order to earn its interest in the Crest JV Tenements.

Further, there is a risk that DCX may not be able to obtain the required funding to proceed with the Joint Venture beyond a decision to mine.

The Directors are unable to predict the risk of:

- (i) financial failure or default by a participant in any joint venture or other contractual arrangement to which the Company (or its group, which would include Lighthouse after the Transaction) is or may become a party;
- (ii) insolvency or other managerial failure by any of the contractors used by the Company in any of its activities; or
- (iii) insolvency or other managerial failure by any of the other service providers used by the Company for any activities.

(e) **The Company and Lighthouse have no history of earnings and no production or revenues**

The Company and Lighthouse are mineral exploration companies, have no history of earnings, and do not have any producing mining operations. The Company has experienced losses from exploration activities (which would continue after the acquisition

of Lighthouse pursuant to the Transaction) and the Company expects to continue to incur losses. No assurance can be given that the Company will identify a mineral deposit (including at the Sylvania Project, if the Transaction occurs) which is capable of being exploited economically or which is capable of supporting production activities.

The Company expects to continue to incur losses from exploration activities in the foreseeable future.

(f) **Future capital requirements**

The Company's capital requirements depend on numerous factors. The Company expects to require further financing in addition to amounts raised under the Capital Raising.

Additional funding may be raised by the Company via the issues of equity, debt or a combination of debt and equity or asset sales. Any additional equity financing will dilute shareholdings, and debt financing, if available, may involve restrictions on financing and operating activities. If the Company is unable to obtain additional financing as needed, it may be required to reduce the scope of its operations and scale back its exploration programmes as the case may be. There is no guarantee that the Company will be able to secure any additional funding or be able to secure funding on terms favourable to the Company.

(g) **New projects and acquisitions**

The Company may make acquisitions in the future as part of future growth plans. In this regard, the Directors of the Company will use their expertise and experience in the resources sector to assess the value of potential projects that have characteristics that the Directors consider are likely to provide returns to Shareholders.

There can be no guarantee that any new project acquisition or investment will eventuate from these pursuits, or that any acquisitions will result in a return for Shareholders. Such acquisitions may result in use of the Company's cash resources and/or the issuance of equity securities, which will dilute shareholdings.

(h) **Native title, cultural heritage and sacred sites**

Mining tenements in Australia are subject to native title laws and may be subject to future native title applications. Native title may preclude or delay granting of exploration and mining tenements or the ability of the Company to explore, develop and/or commercialise the mining tenements. Considerable expenses may be incurred negotiating and resolving issues, including any compensation agreements reached in settling native title claims lodged over any of the mining tenements held or acquired by the Company (or Lighthouse).

The presence of Aboriginal sacred sites and cultural heritage artefacts on mining tenements is protected by Western Australian and Commonwealth laws. Any destruction or harming of such sites and artefacts may result in the Company incurring significant fines and court injunctions. The existence of such sites may limit or preclude exploration or mining activities on those sites, which may cause delays and additional expenses for the Company in obtaining clearances.

The Sylvania Project is situated within a number of Native Title Determination areas managed by various organisations including:

- (i) Karlka Nyiyaparli Aboriginal Corporation RNTBC;
- (ii) Ngarlawangga Aboriginal Corporation RNTBC; and
- (iii) Jidi Jidi Aboriginal Corporation RNTBC;

on behalf of the Ngarlawangga, Nharnuwangga, Wajarri and Nyiyaparli Peoples.

Industry Specific Risks

(i) Nature of mineral exploration and mining

The business of mineral exploration, development and production is subject to risk by its nature. The Sylvania Project and the Company's existing projects are at an early stage of exploration (with no guarantee of ever becoming producing assets) and Shareholders should understand that mineral exploration, development and mining are high-risk enterprises, only occasionally providing high rewards.

The success of the Company depends, among other things, on successful exploration, feasibility of projects, securing and maintaining title to tenements and consents, successful design, construction, commissioning and operating of mining and processing facilities, successful development and production in accordance with forecasts and successful management of the operations. Exploration and mining activities may also be hampered by force majeure circumstances, land claims and unforeseen mining problems.

There is no assurance that exploration and development of the mineral tenement interests currently owned by the Company or the Sylvania Project, or any other projects that may be acquired in the future, will result in the discovery of mineral deposits which are capable of being exploited economically. Even if an apparently viable deposit is identified, there is no guarantee that it can be profitably exploited. If such commercial viability is never attained, the Company may seek to transfer its property interests or otherwise realise value, or the Company may even be required to abandon its business and fail as a "going concern".

Whether a mineral deposit will be commercially viable depends on a number of factors, which include, without limitation, the particular attributes of the deposit, such as size, grade and proximity to infrastructure, metal prices, which fluctuate widely, and government regulations, including, without limitation, regulations relating to prices, taxes, royalties, land tenure, land use, exporting of minerals and environmental protection. The combination of these factors may result in the Company expending significant resources (financial and otherwise) on tenements without receiving a return. There is no certainty that expenditures made by the Company towards the search and evaluation of mineral deposits will result in discoveries of an economically viable mineral deposit.

The Company has relied on and may continue to rely on consultants and others for mineral exploration and exploitation expertise. The Company believes that those consultants and others are competent and that they have carried out their work in accordance with internationally recognised industry standards. However, if the work conducted by those consultants or others is ultimately found to be incorrect or inadequate in any material respect, the Company may experience delays or increased costs in exploring or developing its tenements.

(j) Results of studies

Subject to the results of any future exploration and testing programs, the Company may progressively undertake a number of studies in respect to the Company's current projects or any new projects (including the Sylvania Project if Lighthouse is acquired). These studies may include scoping studies, pre-feasibility studies and bankable feasibility studies.

These studies may not occur, but if they are completed, they would be prepared within certain parameters designed to determine the economic feasibility of the relevant project within certain limits. There can be no guarantee that any of the studies will confirm the economic viability of the Company's projects or the results of other studies undertaken by the Company (e.g. the results of a feasibility study may materially differ to the results of a scoping study).

Further, even if a study determines the economics of the Company's projects, there can be no guarantee that the projects will be successfully brought into production as assumed or

within the estimated parameters in the feasibility study, once production commences including but not limited to operating costs, mineral recoveries and commodity prices.

In addition, the ability of the Company to complete a study would be dependent on the Company's ability to raise further funds to complete the study as required.

(k) **Resource and Reserve estimates**

Ore reserve and mineral resource estimates are expressions of judgment based on drilling results, past experience with mining properties, knowledge, experience, industry practice and many other factors. Estimates which are valid when made may change substantially when new information becomes available. Mineral resource and ore reserve estimation is an interpretive process based on available data and interpretations and thus estimations may prove to be inaccurate. The Company has no ore reserves, and no ore reserves are defined in relation to the Sylvania Project. Further, such project may never become feasible and consequently no forecast is made of whether or not any ore reserve will be defined in future.

The actual quality and characteristics of mineral deposits cannot be known until mining takes place and will almost always differ from the assumptions used to develop resources. Further, ore reserves are valued based on future costs and future prices and, consequently, the actual ore reserves and mineral resources may differ from those estimated, which may result in either a positive or negative effect on operations.

Should the Company encounter mineralisation or formations different from those predicted by past drilling, sampling and similar examinations, resource estimates may have to be adjusted and mining plans may have to be altered in a way which could adversely affect the Company's operations.

(l) **Operational risks**

The operations of the Company may be affected by various factors which are beyond the control of the Company, such as failure to locate or identify mineral deposits, failure to achieve predicted grades in exploration or mining, operational and technical difficulties encountered in exploration and mining, difficulties in commissioning and operating plant and equipment, mechanical failure or plant breakdown, unanticipated metallurgical problems which may affect extraction costs, adverse weather conditions, industrial and environmental accidents, industrial disputes and unexpected shortages, delays in procuring, or increases in the costs of consumables, spare parts, plant and equipment, fire, explosions and other incidents beyond the control of the Company. The operations of the Company may also be affected by various other factors, including failures in internal controls and financial fraud.

These risks and hazards could also result in damage to, or destruction of, production facilities, personal injury, environmental damage, business interruption, monetary losses and possible legal liability. While the Company currently intends to maintain insurance within ranges of coverage consistent with industry practice, no assurance can be given that the Company will be able to obtain such insurance coverage at reasonable rates (or at all), or that any coverage it obtains will be adequate and available to cover any such claims.

(m) **Mine development**

No mines have been developed by the Company or Lighthouse. Possible future development of mining operations at the Company's existing projects or at the Sylvania Project or other tenements applied for or acquired by the Company may not occur and is dependent on a number of factors including, but not limited to, the acquisition and/or delineation of economically recoverable mineralisation, favourable geological conditions, the grant of tenure, availability of funding on reasonable terms for such development and favourable mining, processing, metallurgical, infrastructure, economic, heritage,

environmental, engineering, social, government, native title and other legal matters and receiving the necessary approvals from all relevant authorities and parties.

None of the Company's existing projects or the Sylvania Project are currently economically feasible and there is no forecast made of whether any of them will be feasible in future.

If the Company commences production on any existing or future projects, its operations may be disrupted by a variety of risks and hazards which are beyond the control of the Company, such as weather patterns, unanticipated technical and operational difficulties encountered in exploration, development, extraction and production activities, mechanical failure of operating plant and equipment, shortages or increases in the price of consumables, spare parts and plant and equipment, cost overruns, access to the required level of funding and contracting risk from third parties providing essential services.

No assurance can be given that the Company will achieve commercial viability through the development of existing or future projects.

(n) **Metallurgical risks**

The economic viability of mineralisation depends on a number of factors such as the development of an economic process route for metal concentrates, which may or may not ultimately be successful. Further, changes in mineralogy may result in inconsistent metal recovery.

(o) **Environmental regulation risk**

The Company's existing projects and the Sylvania Project are subject to State and Federal laws and regulations regarding environmental matters. The governments and other authorities that administer and enforce environmental laws and regulations determine these requirements. As with all exploration projects and mining operations, the Company's and Lighthouse's activities are expected to have an impact on the environment, particularly, if they result in mine development.

The cost and complexity of complying with the applicable environmental laws and regulations may prevent the Company from being able to develop mineral deposits (including after it acquires Lighthouse). There are also risks that the Company or Lighthouse may breach environmental laws and regulations, with consequential adverse effects on the financial position and performance of the Company.

Further, the Company will require approvals from relevant authorities before it can undertake activities that are likely to impact the environment (including after it acquires Lighthouse). Failure to obtain such approvals will prevent the Company from undertaking its desired activities. The Company is unable to predict the effect of additional environmental laws and regulations which may be adopted in the future, including whether any such laws or regulations would materially increase the Company's cost of doing business or affect its operations in any area.

There can be no assurances that new environmental laws, regulations or stricter enforcement policies, once implemented, will not oblige the Company to incur significant expenses and undertake significant investments which could have a material adverse effect on the Company's business, financial condition and results of operations.

(p) **Environmental liabilities risk**

The Company's activities are subject to potential risks and liabilities associated with (without limitation) the potential pollution of the environment and the necessary disposal of mining waste products resulting from mineral exploration and production. Insurance against environmental risk (including potential liability for pollution or other hazards as a result of the disposal of waste products occurring from exploration and production) is not generally available to the Company (or to other companies in the minerals industry) at a

reasonable price. To the extent that the Company becomes subject to environmental liabilities, the satisfaction of any such liabilities would reduce funds otherwise available to the Company and could have a material adverse effect on the Company. Laws and regulations intended to ensure the protection of the environment are constantly changing and are generally becoming more restrictive.

(q) **Occupational Health and Safety Risk**

The Company is committed to providing a healthy and safe environment for its personnel, contractors and visitors. However, exploration, development and other mining industry activities have inherent risks and hazards. While the Company provides appropriate instructions, equipment, preventative measures, first aid information and training to all stakeholders through its occupational, health and safety management systems, health and safety incidents may nevertheless occur. Any illness, personal injury, death or damage to property resulting from the Company's activities may lead to a claim against the Company.

(r) **COVID-19**

The global economic outlook is facing uncertainty due to the current COVID-19 pandemic which is impacting global capital markets and companies' abilities to conduct business operations. The Company will seek to monitor and assess its ability to conduct operations in light of the COVID-19 pandemic. However, as the situation with respect to COVID-19 continues to develop (and various government restrictions may be implemented), there can be no assurance that the Company will be able to continue to mitigate any adverse effects of COVID-19 on its operations and planned business activities.

Further, the Company is ultimately exposed to the general economic conditions globally which could have an adverse effect on the operating and financial performance of the Company. A prolonged economic contraction as a result of COVID-19 and/or other factors could impact on the Company's ability to conduct its operations.

General Risks

(s) **Securities investments**

There are risks associated with any securities investment.

There is no guarantee that an active trading market in the Shares will continue or that the price of Shares will increase. The prices at which Shares trade may fluctuate in response to a number of factors.

Further, the stock market is prone to price and volume fluctuations. There can be no guarantee that trading prices will be sustained. These factors may materially affect the market price of the Shares, regardless of the Company's operational performance.

Neither the Company nor the Directors warrant the future performance of the Company or any return on an investment in the Company.

(t) **Economic risk**

Changes in the general economic climate in which the Company operates may adversely affect the financial performance of the Company. Similarly, share market conditions may affect the value of the Company's quoted securities regardless of the Company's operating performance. Factors that may contribute to that general economic climate and the market price of Shares include, but are not limited to:

- (i) changes in government policies, taxation and other laws;
- (ii) the strength of the equity and share markets in Australia and throughout the world;
- (iii) movement in, or outlook on, exchange rates, interest rates and inflation rates;
- (iv) industrial disputes in Australia and overseas;
- (v) changes in investor sentiment toward particular market sectors or commodities;

- (vi) financial failure or default by an entity with which the Company may become involved in a contractual relationship; and
- (vii) natural disasters, social upheaval, war or acts of terrorism.

(u) **Tax law and application**

The application of and changes in relevant tax laws (such as income tax, goods and services tax (or equivalent) and stamp duty), rules relating to deductible liabilities, or changes in the way those tax laws are interpreted, will or may impact the tax liabilities of the Company or the tax treatment of a Shareholder's investment. An interpretation or application of tax laws or regulations by a relevant tax authority that is contrary to the Company's view of those laws may increase the amount of tax paid or payable by the Company.

Both the level and basis of tax may change. Any changes to the current rates of taxes and/or any changes in tax rules and tax arrangements may increase the amount of tax paid or payable by the Company and may also impact Shareholders.

(v) **Commodity price volatility and exchange rate risks**

The Company is exposed to the risks of commodity price volatility and exchange rate fluctuations increasing the Company's costs.

Also, if the Company achieves success leading to mineral production (which may never occur), the revenue it will derive through the sale of product will expose the potential income of the Company to commodity price and exchange rate risks.

Commodity prices and exchange rates fluctuate and are affected by numerous factors beyond the control of the Company.

(w) **Dilution**

In certain circumstances, the Directors may issue equity securities without any vote or action by Shareholders. When the Company issues equity securities, the percentage ownership of Shareholders may be reduced and diluted.

(x) **Competition**

Like many industries, the resources industry is subject to domestic and global competition. The Company has no influence or control over the activities or actions of its competitors and these activities or actions may positively or negatively affect the operating and financial performance of the Company's projects and business.

Many of these companies have greater financial and other resources than the Company and, as a result, may be in a better position to compete for future business opportunities. Many of the Company's competitors not only explore for and produce minerals, but also carry out refining operations and produce other products on a worldwide basis. There can be no assurance that the Company can compete effectively with these companies.

(y) **Reliance on key personnel**

The Company is reliant on a number of key personnel and consultants. The loss of one or more of these key contributors could have an adverse impact on the business of the Company. It may be difficult for the Company to continue to attract and retain suitably qualified and experienced people, due to the relatively small size of the Company, compared with other industry participants.

(z) **Litigation risk**

Legal proceedings may arise from time to time in the course of the Company's activities. Legal proceedings brought by third parties including but not limited to joint venture partners or employees could negatively impact the Company (including after it acquires Lighthouse).

(aa) **Unforeseen expenses**

The Company may incur unforeseen expenses. In those circumstances, the expenditure proposals of the Company may be adversely affected.

(bb) **Force Majeure**

The Company's projects now or in the future may be adversely affected by risks outside the control of the Company such as labour unrest, civil disorder, war, subversive activities or sabotage, fires, floods, explosions or other catastrophes, epidemics or quarantine restrictions.

(cc) **Insurance**

The Company intends to insure its operations in accordance with industry practice. However, insurance of all risks associated with exploration, development and mining activities is not always available and, where it is available, the cost may be prohibitively high. The occurrence of an event that is not covered or fully covered by insurance could have a material adverse effect on the business, financial condition and results of the Company.

(dd) **Change in regulations and regulatory risk**

Any material adverse changes in government policies, legislation or shifts in political attitude in Australia that affect mineral mining and exploration activities, tax laws, royalty regulations, government subsidies and environmental issues may affect the viability of a project or the Company. No assurance can be given that amendments to current laws and regulations or new rules and regulations will not be enacted, or that existing rules and regulations will not be applied in a manner which could substantially limit or affect the Company's business (including after it acquires Lighthouse).

The Company's activities are subject to extensive laws and regulations relating to numerous matters such as regulatory and third party consents, conditions including environmental compliance and rehabilitation, taxation, employee relations, health and worker safety, waste disposal, protection of the environment, Native Title and heritage matters, protection of endangered and protected species and other matters. The Company requires permits from regulatory authorities to authorise the Company's operations. These permits relate to matters such as exploration, development, production and rehabilitation activities.

Obtaining necessary permits can be a time consuming process and there is a risk that the Company will not obtain these permits on acceptable terms, in a timely manner or at all. The costs and delays associated with obtaining necessary permits and complying with these permits and applicable laws and regulations could materially delay or restrict the Company from proceeding with the exploration or development of a project or the operation or development of a mine. Any failure to comply with applicable laws and regulations or permits, even if inadvertent, could result in material fines, penalties or other liabilities. In extreme cases, failure could result in suspension of the Company's activities or forfeiture of one or more tenements.

(ee) **Accounting standards**

Australian Accounting Standards (**AAS**) are adopted by the Australian Accounting Standards Board (**AASB**) and are not within the control of the Company and its Directors. The AASB may, from time to time, introduce new or refined AAS, which may affect the future measurement and recognition of key statement of profit or loss and statement of financial position items. There is also a risk that interpretation of existing AAS, including those relating to the measurement and recognition of key statement of profit or loss or statement of financial position items may differ. Any changes to the AAS or to the interpretation of those standards may have an adverse effect on the reported financial performance and position of the Company.

(ff) **Expected future events may not occur**

Certain statements in this document constitute forward looking statements. Such forward looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance and achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by such forward looking statements. Given these uncertainties, prospective Shareholders should not place undue reliance on such forward-looking statements. In addition, under no circumstances should forward looking statements be regarded as a representation or warranty by the Company, or any other person referred to in this document, that a particular outcome or future event is guaranteed.

(gg) **Trading in securities of the Company may not be liquid**

There is no guarantee that there will be an ongoing liquid market for securities of the Company. Accordingly, there is a risk that, should the market or Company's securities become illiquid, the Shareholders will be unable to realise their investment in the Company.

12. Custodian Certification

If on the Record Date you are a Custodian and hold Shares on behalf of one or more persons each of whom is an Eligible Shareholder in Australia or New Zealand (each, a **Participating Beneficiary**), the Offer is made to you and you have the discretion whether to extend the Offer to the Participating Beneficiaries. You may apply up to a maximum of A\$30,000 worth of New Shares for each Participating Beneficiary.

The Company can only issue to a Custodian Shares up to the value of A\$30,000 in a 12-month period unless the Custodian certifies in writing (**Custodian Certificate**):

- (a) either or both of the following:
- (i) that the Custodian holds Shares on behalf of one or more Participating Beneficiaries that are not Custodians; and
 - (ii) that another Custodian (**Downstream Custodian**) holds beneficial interests in Shares on behalf of one or more Participating Beneficiaries, and the Custodian holds the Shares to which those beneficial interests relate on behalf of the Downstream Custodian or another Custodian,

on the Record Date and that each Participating Beneficiary has subsequently instructed the following persons:

- (iii) where paragraph 12(a)(i) applies – the Custodian; and
- (iv) where paragraph 12(a)(ii) applies – the Downstream Custodian,

to apply for New Shares on their behalf under the Offer;

- (b) the number of Participating Beneficiaries;
- (c) the name and address of each Participating Beneficiary;

- (d) in respect of each Participating Beneficiary:
 - (i) where paragraph 12(a)(i) applies, the number of Shares that the Custodian holds on their behalf; and
 - (ii) where paragraph 12(a)(ii) applies, the number of Shares to which the beneficial interests relate;
- (e) in respect of each Participating Beneficiary:
 - (i) where paragraph 12(a)(i) applies, the number or the dollar amount of New Shares they instructed the Custodian to apply for on their behalf; and
 - (ii) where paragraph 12(a)(ii) applies, the number or the dollar amount of New Shares they instructed the Downstream Custodian to apply for on their behalf;
- (f) there are no Participating Beneficiaries in respect of which the total of the application price for the following exceeds A\$30,000:
 - (i) the New Shares applied for by the Custodian on their behalf under the Offer in accordance with the instructions in paragraph 12(e); and
 - (ii) any other Shares issued to the Custodian in the 12 months before the application under the Offer as a result of an instruction given by them to the Custodian or Downstream Custodian to apply for Shares on their behalf under an arrangement similar to the Offer;
- (g) that a copy of this document was given to each Participating Beneficiary; and
- (h) where paragraph 12(a)(ii) applies, the name and address of each Custodian who holds beneficial interests in the Shares held by the Custodian in relation to each Participating Beneficiary.

In providing a Custodian Certificate under this paragraph 12, the Custodian may rely on information provided to it by the Participating Beneficiary and any Custodian who holds beneficial interests in the Shares held by the Custodian.

If the Company is not satisfied with the Custodian Certificate (for whatever reason), the Company will not issue any New Shares to the Custodian on behalf of the relevant Participating Beneficiaries.

If you require a Custodian Certificate or require further information about the Custodian application process, you should contact the Share Registry.

If you hold Shares as a trustee or nominee for another person, but are not a Custodian as defined in the glossary below, you cannot participate for beneficiaries in the manner described above. In this case, the rules for multiple single holdings set out in paragraph 8 apply.

13. Effect of making an application and Shareholder certification

If you apply for New Shares (including (without limitation) by submitting payment by BPAY[®], cheque or EFT with or without an Application Form), you:

- (b) irrevocably and unconditionally agree to the Terms & Conditions and the terms of the Application Form;
- (c) acknowledge that your application will be irrevocable and unconditional;
- (d) certify and represent to the Company that you have not applied for more than A\$30,000 worth of New Shares (subject, if applicable, to any valid Custodian Certificate (which is acceptable to the Company) which you have provided to the Company pursuant to paragraph 12 above in your capacity as a Custodian);

- (e) certify that the total of the application price for the following does not exceed A\$30,000 (irrespective of whether you may have received more than one Offer or received Offers in more than one capacity):

 - (v) you agree that if in the future you decide to sell or otherwise transfer the New Shares you will only do so in "regular way" transactions on ASX where neither you nor any person acting on your behalf knows, or has reason to know, that the sale has been pre-arranged with, or that the purchaser is, in the United States;
 - (vi) if you are acting as a nominee or custodian, each beneficial holder on whose behalf you are submitting the Application is resident in Australia or New Zealand and is not in the United States and is not acting for the account or benefit of a person in the United States, and you have not sent and will not send, this document, the Application Form or any information related to the Offer to any such person;
 - (vii) you are in compliance with all relevant laws and regulations (including, without limitation, section 1043A of the Corporations Act (insider trading) and sections 241 to 243 of the Financial Markets Conduct Act 2013 (insider trading) and laws and regulations designed to restrict terrorism financing and/or money laundering);
 - (viii) you are not a "designated person" or "designated entity" (or other like term) for the purpose of any domestic or international law or regulation implementing United Nations sanctions; and

14. Offer costs

The only cost associated with the Offer is the Issue Price for the number of New Shares for which you wish to subscribe.

15. Issue of New Shares and variation on number of New Shares issued

The New Shares will be issued on the Issue Date (unless otherwise determined by the Directors, subject to compliance with the ASX Listing Rules).

The Share Registry will send to you a holding statement in due course following the Issue Date.

The Company intends to raise up to A\$0.5 million through the Offer.

If an Application is refused in whole or in part, the Application Monies will be returned to the applicant in full without interest and the applicant's sole risk. If required, the Company may also scale back applications in such manner as the Directors see fit.

16. What rights will the New Shares carry?

Once the New Shares are issued, they will rank equally with existing Shares and will carry the same voting rights, dividend rights and other entitlements.

17. Can the Company change, suspend or terminate the Offer?

The Company may at any time change, suspend or terminate the Offer. If the Company changes, suspends or terminates the Offer it will advise shareholders through an ASX announcement. The accidental omission to give notice of changes to or suspension or termination of the Offer or the non-receipt of any such notice will not invalidate the change, suspension or termination.

18. Directors' participation

ASX has granted to the Company a waiver of Listing Rule 10.11, such that, because the Company has obtained shareholder approval via a resolution approved at its General Meeting held 5 March 2021 for the issue of the New Shares pursuant to the Offer, Directors (and their associates) who are Eligible Shareholders may (without having to obtain further Shareholder approval), participate in the Offer, on the same terms as all other Eligible Shareholders.
